

Installation of Add-In

SeriesSEE works correctly in Excel 2010+ or greater. SeriesSEE is used through a tab on the ribbon that is created after the right-most tab (Figure 1). The SeriesSEE tab appears after the Add-In has been installed (table 1). The SeriesSEE add-in, *SeriesSee.v2.xlam*, functions like an installed program, because it is always available in Excel and the user can forget where the Add-In is installed.

The distribution folder, **AppendixA_SeriesSEE.v2**, should be unzipped and on a local drive before following the “***Install the SeriesSEE add-in***” instructions. Close this file and move the directory if need be before proceeding.

Install the SeriesSEE add-in.
